

**RURAL DEVELOPMENT  
PROGRAMMING AND TARGET SETTING (2014-2020)**

Indicator plan tables

Article 8 of Regulation (EU) No 1305/2013 describes the content of the Rural Development Programmes (RDPs).

In particular, on the basis of a "SWOT" analysis (using notably common context indicators) and needs assessment, Managing Authorities (MA) will set out a strategy in their programme oriented towards the achievement of the Union Priorities for rural development, and set targets for their specific objectives, at the level of the "Focus Areas (FA)" of the priorities.

These targets will be based on common indicators (one target indicator for each FA).

This WD is complemented by the WD on monitoring which details the definitions of the output indicators and the set of target indicators fiches offering further descriptions of the target indicators.

**The Indicator Plan**

To show how the targets set for 2023<sup>1</sup> (in relation to the priorities and the FAs selected in function of the "SWOT" analysis and the needs assessment) will be achieved, MAs will first plan the measures and financial means to be used for each FA and provide the basic elements of calculation of each target.

This will be set out in the Indicator Plan. It is a set of tables by FA, comprising the targets for 2023 and the planned outputs and planned expenditure, for each rural development measure selected in relation to a corresponding FA. As a measure can be programmed under different FA, the indicator plan would show (and quantify) the specific share of the measure programmed for a given FA (planned outputs, planned expenditure). An excel Indicator Plan tool is available to support the MA in their RDP design; it allows preparing the Indicator Plan based on the specific strategy of the RDP. Annex 1 explains the build up of the Indicator Plan tables and provides the specificities for each of the priorities.

---

<sup>1</sup> In programming terms the period to cover is 2014-2020. With the n+3 rule, implementation can continue until the end of 2023, final date to achieve the targets. In the case of targets P4, FA 5A, 5D and 5E when multi-annual area based measures are concerned (measures 10, 11, 15, 12 and 8 (8.1 and 8.2) targets will be set on the basis of areas paid in 2021 (areas claimed in principle in 2020).

From the FA tables, a consolidated table with planned outputs and planned expenditure by measure can be generated automatically (see Annex 1 - Table 2).

As such, the Indicator Plan provides the planned distribution of resources (expenditure / physical outputs) by measure and by FA, and in relation to the targets for 2023. Physical outputs and expenditure are only counted once in this plan (except for Priority 1, which is an aggregate of outputs and/or expenditure from the other FAs, see Annex 1).

To be noted:

- The target indicators: a specific effort has been made to use simplified target indicators which can be more easily quantified at programme level, and more easily monitored. In most cases, targets can be calculated from the planned outputs of measures in the Indicator Plan, putting them in context with statistics / context indicators. See the definitions of target indicators in the target indicator fiches.
- The output indicators: only the main output indicators will be in the Indicator Plan (no breakdown by gender, by type of beneficiary, or by type of project which is not meaningful to plan in detail or which is not necessary for the establishment of the targets).

### **Anticipation of contributions to other Focus Areas**

At programming level, the indicator plan will be accompanied by another table showing indicatively and qualitatively how certain RD measures/sub-measures programmed under a given FA are expected to make a contribution to other FAs. This table (Table 11.3 in SFC2014 and Annex2/table 3 in this document) will provide a programme specific overview of expected synergies between FAs, ie the potential contribution of a measure planned under a specific FA to another FA.

Example: a need for increasing the competitiveness of a specific agricultural sector has been identified. The MA has decided to address that need (FA 2A) and has set a quantified target in % of total agricultural holdings to be supported. Therefore investment in physical assets for that sector (4.1) is programmed under FA 2A. Then, planned allocation and planned outputs are set under FA 2A in relation with the target set (consistency between resources and targets). On top of that, that investment in physical assets programmed under FA 2A might also have some positive effects on the FA 5B energy efficiency. In that case, that additional contribution is flagged in table 3.

### **General requirements**

#### **Additional national financing and State Aid**

Article 82 of Regulation (EU) No 1305/2013 (Additional national financing) and Article 81 of Regulation (EU) No 1305/2013 (State aid) are to be included in the Indicator Plan for the measures with top ups, i.e. taken into account for target setting, planned outputs and planned expenditure.

### **Transfer from 1<sup>st</sup> pillar**

1<sup>st</sup> pillar transfers reinforcing certain measures are to be programmed and included in the Indicator Plan, i.e. taken into account for target setting, planned outputs and planned expenditure.

### **Combination of measures/integrated projects**

It is recommended to programme these in consistency with the Financial Plan. The total financial allocation/planned outputs can be programmed under the predominant measure.

### **On-going commitments from the previous period**

Ongoing commitments based on the 2007-2013 rules and paid through 2014-2020 EAFRD are included in the Indicator Plan, i.e. taken into account for target setting, planned outputs and planned expenditure.

However, 'Early retirement', 'Skills acquisition animation and implementation' and 'Meeting standards' (measures which do not exist under the 2014-2020 Rural Development Policy) should not be considered in the Indicator Plan.

### **Sub-programme**

A separate Indicator Plan has to be filled-in based on the specific sub-programme SWOT and needs assessment. This Indicator Plan will follow exactly the same structure (by FA, common targets set by FA and planned output/expenditure). The main Indicator Plan will include the specific sub-programme Indicator Plan.

### **Additional Focus Areas**

If an additional FA is programmed, a RDP specific target should be defined and quantified. The planned output and expenditure by measures using the common indicators should also be quantified as for the other FAs.

### **Financial instruments (FI)**

In the Indicator Plan, expenditure and outputs for a FI are programmed under the relevant measure (e.g. investment measures M04, M6.4, M07, M8.6, M16 and M19). If both grants and FI are implemented in the same measure and FA, no distinction is requested.

For the total public expenditure, the total amount of public contribution (EAFRD and national counterpart) to be paid to the FI fund (loan, guarantee, equity/quasi-equity or other funds) is programmed (codes IV. 16.1.4 + 16.2.1)<sup>2</sup>.

For the planned outputs, as the FI will be implemented through investment measures, the relevant output indicators are:

- Expected Number of operations supported (measures M04, M07, M8.6 and M19): it will correspond to Number of loan contracts signed with final recipient (code V. 17.) + Number of final recipients supported by guarantees (V. 18.6) + Number of equity or quasi-equity investments made (code V. 19.5) + Number of other financial product instruments made to final recipient (code V. 20.5)
- Number of beneficiaries supported (measures M6.4 and M4.1): it will correspond to Number of final recipients supported by loans (code V. 17.) + Number of final recipients supported by guarantees (code V. 18.) + Number of final recipients supported by equity or quasi-equity investments (code V. 19.6) + Number of final recipients supported by other financial product (code V. 20.6).

If FI is foreseen under the measure M16 cooperation, no planned outputs are set, only planned total public expenditure.

Planned Total investment should not be set for operations supported through FI.

\* \* \*

In annex:

- Annex 1: Indicator plan tables (+ Table 1 and Table 2)
- Annex 2: contributions of interventions to other FAs.

---

<sup>2</sup> See Fiche 4B Monitoring of Financial Instruments and provision of monitoring information to the Commission

**ANNEX 1**

**INDICATOR PLAN**

The Indicator Plan is a set of tables accompanying the strategy of the RDP, quantifying the targets for the period 2014-2020, as well as the main planned outputs and the planned expenditure for each FA selected under the RDP.

As a measure/sub-measure can be programmed under different FAs, the Indicator Plan shows (and quantifies) the specific share of the measure/sub-measure programmed for a given FA (planned outputs, planned expenditure).

As such, the Indicator Plan provides the **planned distribution of resources (expenditure / physical outputs) by measure and by FA**, and in relation to the targets for 2020.

\* \* \*

*The tables presented in this Indicator Plan contain relevant combinations of measures per FA based on a generic intervention logic, but MAs can change these combinations in function of their specific situation and identified needs (by taking out measures and/or adding others from the Rural Development toolkit).*

In the Indicator Plan, when output indicators refer to specific sub-measures such as '*total public expenditure (6.1)*', only expenditure planned for these sub-measures should be considered. On the contrary, when an output indicator does not specifically refer to some sub-measures, the output covers the whole measure programmed under the FA (e.g. '*Total public expenditure*').

Table 1 (page 31) provides an overview of the most relevant measures/sub-measures which can be programmed for each FA. Where a measure (part of measure) counts for the target of a FA, this is indicated specifically. This table can be used as a first guide when preparing the Indicator Plan and selecting the measures by FA.

Table 2 (page 35) can be generated automatically from the completed Indicator Plan tables. It provides an overview of the planned output and planned expenditure by measure and by FA and allows to check the total (public) expenditure by measure against the Financial Plan.

<b>PRIORITY 1: "Fostering knowledge transfer and innovation in agriculture, forestry and rural areas"</b>
---

Priority 1 is a specific case.

As 'Knowledge Transfer and Innovation' is a cross-cutting theme, and because innovation is at the same time difficult to capture in an indicator and difficult to anticipate, the Indicator Plan would provide a summary of the measures programmed across the other FAs which are most relevant for 'Knowledge Transfer and Innovation' (namely M01 "Knowledge transfer and information actions", M02 "Advisory services, farm management and farm relief services" and M16 "Co-operation". The targets for the priority 1 FAs would be based on the planned outputs (/expenditure) of these 'Knowledge Transfer and Innovation' measures for the other priorities.

### 1) Focus area 1A

<i>data generated from the aggregation of the indicator plan of priorities 2 to 6</i>		
<b>1A Fostering innovation, cooperation, and the development of the knowledge base in rural areas</b>		
<b>target</b>	<b>% of Total public expenditure</b>	
	<b>2020</b>	
	<b>#DIV/0!</b>	
	<b>total RDP planned public</b>	
<b>planned output 2014-2020</b>		
<b>1 (14)</b>	Total public expenditure € (trainings, farm exchanges, demonstration) (1.1 to 1.3)	0
<b>2 (15)</b>	Total public expenditure € (2.1 to 2.3)	0
<b>16 (35)</b>	Total public expenditure € (16.1 to 16.9)	0

The target indicator for FA 1A is the share of the public expenditure of the programme dedicated to the 'Knowledge Transfer and Innovation' measures (programmed through the other FAs).

**2) Focus area 1B**

<b>1B Strengthening the links between agriculture, food production and forestry and research and innovation, including for the purpose of improved environmental management and performance</b>		
<b>target</b>	<b>Nr of cooperation operations planned under the cooperation measure (groups, networks/clusters, pilot projects...)</b>	
	<b>2020</b>	
	<b>0</b>	
<b>planned output 2014-2020</b>		
<b>16 (35)</b>	Nr of EIP operational groups to be supported (establishment and operation)	
	Nr of other cooperation operations (groups, networks/clusters, pilot projects...) (16.2 to 16.9)	

The Indicator Plan would show how many co-operation projects are expected (under the programme) and, in particular, how many operational groups are targeted to be financed through the co-operation measure.

**3) Focus area 1C**

<b>1C Fostering lifelong learning and vocational training in the agriculture and forestry sectors</b>		
<i>data generated from the aggregation of the indicator plan of priorities 2 to 6</i>		
<b>target</b>	<b>Nr of participants to trainings</b>	
	<b>2020</b>	
	<b>0</b>	
<b>planned output 2014-2020</b>		
<b>1 (14)</b>	Nr of participants to trainings (1.1)	<b>0</b>

The targeted number of participants in trainings can illustrate the effort towards this FA. The total is an aggregation of the planned trainings for the different FAs of the programme.

**PRIORITY 2: "Enhancing farm viability and competitiveness of all types of agriculture in all regions and promoting innovative farm technologies and the sustainable management of forests"**

**1) Focus area 2A**

<b>2A Improving the economic performance of all farms and facilitating farm restructuring and modernisation, notably with a view to increase market participation and orientation as well as agricultural diversification</b>		
<b>Target</b>	<b>% of agriculture holdings with RDP support for investment in restructuring or modernisation</b>	
	<b>Nr</b>	<b>%</b>
<b>farm holding receiving support for investment by 2020</b>	<b>0</b>	<b>#DIV/0!</b>
<b>Total Nr of holdings (base year)</b>		
<b>planned output 2014-2020</b>		
<b>Measures</b>		
<b>4 (17)</b>	Nr of holdings supported for investment in agricultural holdings (4.1)	
	Total public expenditure € (4.1)	
	Total public expenditure for investments in infrastructure (4.3)	
	Total investment € (public + private)	
	Total public expenditure €	
<b>6 (19)</b>	Nr of beneficiaries (holdings) receiving start up aid development small farms (6.3)	
	Total investment € (public + private)	
	total public expenditure €	
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings
		Total public for training/skills
	Total public expenditure € (trainings, farm exchanges, demonstration) (1.1 to 1.3)	
<b>2 (15)</b>	Nr of beneficiaries advised (2.1)	
	Total public expenditure € (2.1 to 2.3)	
<b>16 (35)</b>	Total public expenditure €	

Under this FA, many measures / sub-measures could be programmed (see also Table 1 (page 31)).

The target is based on the number of holdings to receive investment support for restructuring (M04 'Investments in physical assets"), compared to the total number of farms of the RDP. The farm investment (sub-) measure is considered to be a key measure in the package of measures relevant for restructuring.

**2) Focus area 2B**

<b>2B Facilitating entry of adequately skilled farmers into the agricultural sector and in particular generational renewal</b>			
<b>Target</b>	<b>% of agriculture holdings with RDP supported business development plan/investment for young farmers</b>		
	<b>Nr</b>	<b>%</b>	
<b>farm holdings supported by 2020</b>	<b>0</b>	<b>#DIV/0!</b>	
<b>Total Nbr. of holdings (base year)</b>			
<b>planned output 2014-2020</b>			
<b>Measures</b>			
<b>6 (19)</b>		start up aid young farmers (6.1)	
	Nr of beneficiaries (holdings) receiving	support for investments in non-agric activities in rural areas (6.4)	
		transfer payment (6.5)	
		Total investment € (public + private)	
		total public expenditure (€) (6.1)	
		total public expenditure (€)	
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings	
		Total public for training/skills	
		Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)	
<b>2 (15)</b>		Nr of beneficiaries advised (2.1)	
		Total public expenditure (€) (2.1 to 2.3)	
<b>4 (17)</b>		Nr of holdings supported for investment in agricultural holdings (support to the business plan of young farmers) (4.1)	
		Total investment € (public + private)	
		Total public expenditure (€)	
<b>16 (35)</b>		Total public expenditure (€)	

The target is based on the key (sub-) measure for young farmers needing support to set up their holding (M06 "Farm and business development", 6.1 "Business start-up aid for young farmers") compared to the total number of (existing) agricultural holdings.

In case 6.1 "Business start-up aid for young farmers" is not programmed as the key sub-measure under this FA (based on the RDP strategy): farm holdings (y) supported under M04 "Investments in physical assets" are used in the calculation of the target (only if 6.1 is not programmed, to avoid double counting).

**PRIORITY 3: "Promoting food chain organisation, including processing and marketing of agricultural products, animal welfare and risk management in agriculture"**

**1) Focus area 3A**

3A Improving competitiveness of primary producers by better integrating them into the agri-food chain through quality schemes, adding value to agricultural products, promotion in local markets and short supply circuits, producer groups and inter-branch organisations			
target	% of agricultural holdings supported under quality schemes, local markets and short supply circuits, and producer groups/organisations		
		Nr	%
	Nbr of holdings supported by 2020	0	#DIV/0!
	Total nb of holdings (base year)		
<b>planned output 2014-2020</b>			
<b>Measures</b>			
<b>3 (16)</b>	Nr of holdings supported (3.1)		
	Total public expenditure (€) (3.1, 3.2)		
<b>9 (27)</b>	Nr of optaions supported (producer groups set up)		
	Nr of holdings participating in producer groups supported		
	Total public expenditure (€)		
<b>16 (35)</b>	Nr of agricultural holdings participating in cooperation/local promotion among supply chain actors (16.4)		
	Total public expenditure (€)		
<b>4 (17)</b>	Nr of operations supported for investment (e.g. in agricultural holdings, in processing and marketing of ag. products) (4.1 and 4.2)		
	Total investment € (public + private)		
	Total public expenditure (€)		
<b>6 (19)</b>	Nr of beneficiaries receiving start up aid/support for investment in non-agric activities in rural areas (6.2 and 6.4)		
	Total investment € (public + private)		
	total public expenditure (€)		
<b>7 (20)</b>	Nr of operations supported for investments of small scale infrastructure, including investments in renewable energy and energy saving (7.2)		
	Total public expenditure (€)		
<b>14 (33)</b>	Nr of beneficiaries		
	Total public expenditure (€)		
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings	
		Total public for training/skills	
		Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)	

This FA has 3 components. The target indicator is built on the basis of 3 key outputs related to these 3 components, i.e. the number of holdings of farmers participating in quality schemes, local markets and short supply circuits, and producer groups compared to the total number of holdings. Note that in the measures relevant for integrating primary producers into the food chain, animal welfare has been included.

## **2) Focus area 3B**

<b>3B Supporting farm risk prevention and management</b>			
<b>target</b>	<b>% of agricultural holdings participating in risk management schemes</b>		
		<b>Nr</b>	<b>%</b>
	<b>Nbr of holdings supported by 2020</b>	0	#DIV/0!
	<b>Total Nbr. of holdings (base year)</b>		
<b>planned output 2014-2020</b>			
<b>Measures</b>			
<b>17 (36)</b>	Nr of farm holdings supported for premium for insurance (17.1)		
	Total public expenditure (€) (17.1)		
	Nr of farm holdings participating in mutual funds (17.2)		
	Total public expenditure (€) (17.2)		
	Nr of farm holdings participating to income stabilisation tool (17.3)		
	Total public expenditure (€) (17.3)		
<b>5 (18)</b>	Nr of beneficiaries for preventive actions (5.1)	farm holdings	
		public entites	
	Total public expenditure (€) (5.1)		
	Total public expenditure (€) (5.1 to 5.2)		
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings	
		Total public for training/skills	
	Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)		
<b>2 (15)</b>	Nr of beneficiaries advised (2.1)		
	Total public expenditure (€) (2.1 to 2.3)		
<b>16 (35)</b>	Total public expenditure (€)		

As for FA 3A, the target would embrace 4 key outputs, i.e. the number of farms participating in the risk management schemes and farms undertaking preventive actions.

**PRIORITY 4: "Restoring, preserving and enhancing ecosystems related to agriculture and forestry"**

**Targets:**

For the 3 FAs of priority 4, individual targets are set in terms of number of physical hectares on which an action for biodiversity, water and soil is planned compared to the total number of hectares of agricultural land or forestry land, i.e. 3 targets for agricultural land and 3 targets for forestry land. As certain environmental measures/type of operation are likely to be designed to address more than one specific objective on the same physical hectare, the same type of operation can be counted for more than one target (4 A, 4B, 4C but also 5D and 5E<sup>3</sup>). As a consequence, the target for each FA is set independently and the number of hectares cannot be added up across the 3 FAs.

It is to be noted that the targets should always be expressed in physical hectares (e.g. where 2 types of operation addressing the same FA overlap on one hectare, only 1 hectare should be counted in the value of the target of that FA). However, the same hectare can be counted against the "biodiversity" target and the "water management" target, as explained in the first paragraph.

In order to support the planning of targets (for Priority 4 and 5 (5D and 5E)), the programme contains an indication of the different environmental types of operations and their use to achieve environmental objectives (see table A1 for the area-based agricultural measures and Table A2 for forest areas<sup>4</sup>).

**Output indicators and financial allocation:**

Of the key relevant measures for this priority, some have a dedicated nature (e.g. N2000 for biodiversity), others such as agri-environment-climate, afforestation of agricultural land, establishment of agro-forestry systems and organic farming can be used to address more than one issue. Therefore, the interventions would not be programmed specifically for each FA, but globally at the level of Priority 4 (block programming) to avoid any double counting at output and financial allocation level. However, a distinction is proposed between the measures and targets for agricultural land, and the measures and targets for forestry land.

---

<sup>3</sup> See section on FA 5D and 5E

<sup>4</sup> Table A1 and A2 (section 11.4 in SFC2014): For measure 10 (in Table A1) and measure 15 (in Table A2), it is expected to break it down at 'type of operation' level because each type of operation can be programmed for different purposes (and therefore be counted under different targets). Nevertheless, similar types of operation can be merged as long as they contribute to the same targets (e.g. if types of operation x and y, with similar land management practices are contributing to targets 4A and 4C, only 1 row can be filled in).

Table A1 - Support table to show how environmental measures are programmed to achieve one (or more) environment/climate targets.								
				Addressing as main issue(s)				
				Priority 4			Priority 5

2 (15)	Nr of beneficiaries advised (2.1)							
	Total public expenditure (€) (2.1 to 2.3)							
16 (35)	Total public expenditure (€)							

**PRIORITY 5: "Promoting resource efficiency and supporting the shift towards a low carbon and climate resilient economy in agriculture, food and forestry sectors"**

**1) Focus area 5A**

5A Increasing efficiency in water use by agriculture		
target	% of irrigated land switching to more efficient water use (through investments supported by RDP)	
	Ha	%
Total area by 2020	0	#DIV/0!
total irrigated land (base year)		
planned output 2014-2020		
Measures 		
4 (17)	Nr of operations supported for investment (4.1, 4.3)	
	Area (ha) concerned by investments for saving water (e.g. more efficient irrigation systems...)	
	Total investment € (public + private)	
	Total public expenditure (€)	
10 (28)	Area (ha) (e.g. reduction of irrigated land)	
	Total public expenditure (€)	
1 (14)	training/skills acquisition (1.1)	Nr of participants in trainings
		Total public for training/skills
	Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)	
2 (15)	Nr of beneficiaries advised (2.1)	
	Total public expenditure (€) (2.1 to 2.3)	
16 (35)	Total public expenditure (€)	

For FA 5A, the target would take into account the hectares concerned by investments in irrigation systems (to make these systems more efficient, using the measure M04), and the hectares dedicated specifically to the reduction of irrigated land under M10 "Agri-environment-climate".

**2) Focus area 5B**

<b>5B Increasing efficiency in energy use in agriculture and food processing</b>		
<b>target</b>	<b>Total investment in energy savings and efficiency (€)</b>	
	<b>2020</b>	
	<b>0</b>	
<b>planned output 2014-2020</b>		
<b>Measures</b>		
<b>4 (17)</b>	Nr of operations supported for investment (in agricultural holdings, in processing and marketing of ag. products) (4.1, 4.2 and 4.3)	
	Total investment € (public + private)	
	Total public expenditure (€)	
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings
		Total public for training/skills
	Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)	
<b>7 (20)</b>	Nr of operations supported for investments of small scale infrastructure, including investments in renewable energy and energy saving (7.2)	
	Total investment € (public + private)	
	Total public expenditure (€)	
<b>2 (15)</b>	Nr of beneficiaries advised (2.1)	
	Total public expenditure (€) (2.1 to 2.3)	
<b>16 (35)</b>	Total public expenditure (€)	

For FA 5B, the main measure would be M04 "Investments in physical assets" but also the investments in small scale infrastructure for energy savings under M07. The target would be expressed in the volume of investment specifically dedicated to energy saving and efficiency.

**3) Focus area 5C**

<b>5C Facilitating the supply and use of renewable sources of energy, of by products, wastes, residues and other non food raw material for purposes of the bio-economy</b>		
<b>target</b>	<b>total investment in renewable energy production (€)</b>	
	<b>2020</b>	
	<b>0</b>	
<b>planned output 2014-2020</b>		
<b>Measures</b>		
<b>4 (17)</b>	Nr of operations supported for investment (4.1, 4.3)	
	Total investment € (public + private)	
	Total public expenditure (€)	
<b>7 (20)</b>	Nr of operations supported for investments of small scale infrastructure, incl. investments in renewable energy and energy saving (7.2)	
	Total investment € (public + private)	
	Total public expenditure (€)	
<b>6 (19)</b>	Nr of beneficiaries (holdings) receiving start up aid/support for investment in non-agric activities in rural areas (6.2 and 6.4)	
	Total investment € (public + private)	
	Nr of operations	
	Total public expenditure (€)	
<b>8 (21)</b>	Nr of operations for investments in forestry technology and primary processing/marketing (8.6)	
	Total investment € (public + private) (8.6)	
	Total public expenditure (€) (8.6)	
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings
		Total public for training/skills
	Total public expenditure (€)(trainings, farm exchanges, demonstration) (1.1 to 1.3)	
<b>2 (15)</b>	Nr of beneficiaries advised (2.1)	
	Total public expenditure (€)(2.1 to 2.3)	
<b>16 (35)</b>	Total public expenditure (€)	

Four measures would be most relevant for FA 5C: M04 "Investments in physical assets", M07 "Basic services and village renewal in rural areas", M06 "Farm and business development" and sub-measure 8.6 under M08 "Investments in forestry technologies and in processing, in mobilising and in the marketing of forest products". The target would also be expressed as the expected total investment specifically dedicated to the production of renewable energy.

**4) Focus area 5D**

5D Reducing green house gas and ammonia emissions from agriculture					
%of LU concerned by investments in livestock management in view of reducing GHG and/or ammonia emissions			%of agricultural land under management contracts targeting reduction of GHG and/or ammonia emissions		
Total LU concerned by investment	0	#DIV/0!	Total physical area by 2020	b	#VALUE!
total LU (base year)			total agricultural land (base year)		
<b>planned output 2014-2020</b>					
<b>Measures</b>					
<b>4 (17)</b>	Nr of operations supported for investment (e.g. manure storage, manure treatment) (4.1, 4.4 and 4.3)				
	LU concerned by investment in livestock management in view of reducing GHG and ammonia emissions				
	Total investment € (public + private)				
	Total public expenditure (€)				
<b>10 (28)</b>	Area (ha) (e.g. green cover, catch crop, reduced fertilisation, extensification...)				b*
	Total public expenditure (€)				
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings			
		Total public for training/skills			
	Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)				
<b>2 (15)</b>	Nr of beneficiaries advised (2.1)				
	Total public expenditure (€) (2.1 to 2.3)				
<b>16 (35)</b>	Total public expenditure (€)				

For FA 5D, 2 types of interventions would be particularly relevant: investments in manure storage and treatment under M04 "Investments in physical assets", and area-based interventions such as green cover, catch crops, reduced fertilisation, extensification, etc. under M10 "Agri-environment-climate".

To illustrate these 2 types of interventions, 2 targets are proposed for this FA: one expressed in livestock units concerned by the investments, and one expressed in hectares concerned by the land management practices.

To be noted:

- **TARGET LEVEL:** For this second target (% of agricultural land under management contracts targeting reduction of N<sub>2</sub>O and methane emissions), some hectares programmed under the priority 4 can also count (in the value of "b"). This is in the case where a M10 type of operation is designed to jointly contribute to priority 4 environmental objective(s) and FA 5D objectives (see table A1 above, under Priority 4 section).
- **PLANNED OUTPUT LEVEL:** The number of hectares indicated for the M10 ("b\*") in this FA are the hectares specifically dedicated to the reduction of nitrous oxide and methane emissions. They do not include the hectares programmed under priority 4 which are jointly designed to reduce emissions, i.e.  $b^* \leq b$  (block programming).
- In so far as the M10 is block programmed for priority 4 and FA 5D also the knowledge transfer measures (M01 and M02) could be block programmed.

**5) Focus area 5E**

Both forest area and agricultural land can count for this target.

*(see table next page)*

To be noted:

- **TARGET LEVEL:** For the agricultural land, some hectares programmed under the priority 4 can also count (in the value of "a", "b" and "c" in the target). This is in the case where a scheme is designed to jointly contribute to priority 4 environmental objective(s) and FA 5E objectives (see table A1 above, under Priority 4 section).
- **PLANNED OUTPUT LEVEL:** The number of hectares indicated for the M10 ("c\*") or M08 (8.1 and 8.2) ("a\*" and "b\*") in this FA are the hectares specifically dedicated to carbon sequestration on agricultural land. They do not include the hectares programmed under priority 4 which are jointly designed to foster carbon sequestration, i.e.  $c^* \leq c$  (block programming).
- In so far as the M10 is block programmed for priority 4 and FA 5E also the knowledge transfer measures (M01 and M02) could be block programmed.

5e Fostering carbon conservation and sequestration in agriculture and forestry		
target	% of agricultural and forest land under management to foster carbon sequestration/conservation	
	Ha	%
Total Physical area by 2020	a+b+c	#VALUE!
total agricultural and forest land area (base year)		
planned output 2014-2020		
Measures 		
8 (21)	Area (ha) to be afforested (establishment only- 8.1)	a*
	Total public expenditure (€) (8.1)	
	Area (ha) to be established in agro-forestry systems (8.2)	b*
	Total public expenditure (€)(8.2)	
	Nr of operations (investments improving resilience and value of forest ecosystems) (8.5)	
	Total public expenditure (€) (8.5)	
10 (28)	Area (ha) under agri-environment-climate for carbon sequestration	c*
	Total public expenditure (€)	
15 (34)	Areas under forest environment contracts (15.1)	
	Total public expenditure (€)	
4 (17)	Nr of operations of support for non productive investment (4.4)	
	Total investment € (public + private)	
	Total public expenditure (€)	
1 (14)	training/skills acquisition (1.1)	Nr of participants in trainings
		Total public for training/skills
	Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)	
2 (15)	Nr of beneficiaries advised (2.1)	
	Total public expenditure (€) (2.1 to 2.3)	
16 (35)	Total public expenditure (€)	

**PRIORITY 6: "Promoting social inclusion, poverty reduction and economic development in rural areas"**

**1) Focus area 6A**

6A Facilitating diversification, creation and development of small enterprises and job creation		
Target	Nr of jobs created through supported projects	
	2020	
	<i>(Nr of jobs created through supported operations a, b, c)</i>	
<b>planned output 2014-2020</b>		
Measures		
4 (17)	Nr. of beneficiaries of support for investment ( in processing and marketing of ag. products) (4.2)	a
	Total investment € (public + private)	
	Total public expenditure (€)	
6 (19)	Nr of beneficiaries (holdings) receiving start up aid/support for investment in non-agric activities in rural areas (6.2 and 6.4)	b
	Total investment € (public + private)	
	Total public expenditure (€)	
8 (21)	Nr of operations for investments in forestry technology and primary processing/marketing (8.6)	c
	Total investment € (public + private) (8.6)	
	Total public expenditure (€) (8.6)	
1 (14)	training/skills acquisition (1.1)	Nr of participants in trainings
		Total public for training/skills
	Total public expenditure (€)(trainings, farm exchanges, demonstration) (1.1 to 1.3)	
2 (15)	Nr of beneficiaries advised (2.1)	
	Total public expenditure (€) (2.1 to 2.3)	
16 (35)	Total public expenditure (€)	

For FA 6A, the target indicator is the number of jobs created through the projects supported under the most relevant measures/sub-measures (sub-measure 4.2 under M04 "Investment in processing and marketing of agricultural products"; sub-measures 6.2 and 6.4 under M06 "Business start-up aid for non-agricultural activities in rural areas" and "Investments in creation and development of non-

agricultural activities in rural areas"; sub-measure 8.6 under M08 "Investments in forestry technologies and in processing, in mobilising and in the marketing of forest products".

## 2) Focus area 6B

6B Fostering local development in rural areas					
target	%rural population covered by local development strategies			% of rural population benefiting from new or improved services / infrastructures	
		Nr.	%	2020	
	rural pop. covered by 2020	0	0.00%	Net population	#VALUE!
	Total rural pop. (base year)	5509050		e	
	Nr of jobs created (2014-2020)				
<i>(nr of jobs created through supported operations d)</i>					
planned output 2014-2020					
Measure					
7 (20)	Nr of operations	support for drawing up of village development and N2000/HNV area management plans (7.1)			
		support for investments in small scale infrastructure, incl renewable energy infrastructure (7.2)			
		support for investments in local basic services for the rural population (7.4)			
		support for investments in recreational/tourist infrastructure (7.5)			
		support for studies/investments in rural cultural and natural heritage, incl HNV sites (7.6)			
		support for investments in relocation of activities for environmental/quality of life reasons (7.7)			
		others (7.8)			
	Population benefiting from improved services/infrastructures (7.1; 7.2; 7.4; 7.5.;7.6; 7.7; 7.8)				contributes to e
	Total public expenditure (€)				
19(42)	Number of LAGs selected				
	Population covered by LAG				
	Total public expenditure (€)	preparatory support (19.1)			
support for implementation of operations under the CLLD strategy (19.2)				(contributes to d)	
preparation and implementation of cooperation activities of the local action group (19.3)					
1 (14)	training/skills acquisition (1.1)	Nr of participants in trainings			
		Total public for training/skills			
	Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)				
2 (15)	Nr of beneficiaries advised (2.1)				
	Total public expenditure (€) (2.1 to 2.3)				
16 (35)	Total public expenditure (€)				

Two instruments are identified as most relevant for local development:

- M07 "Basic services and village renewal in rural areas"
- M19 "CLLD/LEADER".

Three targets are foreseen for FA 6B:

- The % of rural population covered by local development strategies (as a way to target the areas and their proportion of the total rural areas to implement Community-Led Local Development); of course this target is to be achieved in the first years of the programme when the selection of Local Action Groups (LAGs) is completed;
- The % of rural population benefiting from new or improved services / infrastructures: this target would be estimated from the size of the population in the area covered by the improved service/infrastructure from M07 (municipality, group of municipalities benefiting from the service/infrastructure).
- The jobs created through LEADER projects (operations under the local development strategy). This does not count potential jobs created under the LEADER co-operation projects, or jobs created at the LAG secretariat.

To be noted:

Although LEADER projects can contribute to different FAs, M19 would be entirely programmed under the FA 6B to respect its bottom-up nature. However, LEADER projects would be monitored by themes during the course of implementation of the local development strategy.

**3) Focus area 6C**

<b>6C Enhancing accessibility to, use and quality of information and communication technologies (ICT) in rural areas</b>			
<b>target</b>	<b>% of rural population benefiting from new or improved IT infrastructures</b>		
	<b>2020</b>		
	<b>Total rural pop. (base year)</b>	<b>Net population</b>	<b>target</b>
	<b>5509050</b>	<b>a</b>	<b>#VALUE!</b>
<b>planned output 2014-2020</b>			
<b>Measures</b>			
<b>7 (20)</b>	Nr of operations for investments in broadband infrastructure and access to broadband, incl e-government services (7.3)		
	Population benefiting from new or improved IT infrastructures (e.g. broadband internet)		contributes to a
	Total public expenditure (€)		
<b>1 (14)</b>	training/skills acquisition (1.1)	Nr of participants in trainings	
		Total public for training/skills	
	Total public expenditure (€) (trainings, farm exchanges, demonstration) (1.1 to 1.3)		
<b>2 (15)</b>	Nr of beneficiaries advised (2.1)		
	Total public expenditure (€) (2.1 to 2.3)		
<b>16 (35)</b>	Total public expenditure (€)		

The most relevant instrument for FA 6C is sub-measure 7.3 under M07 "Basic services", which concerns broadband infrastructure, including its creation, improvement and expansion, passive broadband infrastructure and provision of access to broadband and public e-government solutions.

The target is expressed as the % of rural population covered by these improved services / infrastructures (population of the municipalities or groups of municipalities serviced).

**Annex 1 - Table 1 - - Overview of the most relevant measures/submeasures to programme for each focus area (indicative)**

Rural Development measures toolkit 2014-2020				P1			P2		P3		P4			P5					P6			
<i>Measures</i>	<i>code</i>	<i>sub-measures</i>		1a	1b	1c	2a	2b	3a	3b	4a	4b	4c	5a	5b	5c	5d	5e	6a	6b	6c	
art 14	knowledge transfer and information actions	1																				
		1.1	support for vocational training and skills acquisition actions																			
		1.2	support for demonstration projects/information actions																			
		1.3	support for short-term farm and forest management exchange as well as farm and forest visits																			
art 15	advisory services, farm management and farm relief services	2																				
		2.1	support for providing advisory services																			
		2.2	support for the setting up of farm management, farm relief and farm advisory services																			
		2.3	support for training of advisors																			
art 16	quality schemes for agricultural products and foodstuffs	3																				
		3.1	support for new participation in quality schemes																			
		3.2	Support for information and promotion activities implemented by groups of producers in the internal market																			
art 17	investments in physical assets	4																				
		4.1	support for investments in agricultural holdings																			
		4.2	support for investments in processing/marketing and/or development of agricultural products																			
		4.3	support for investments in infrastructure related to development, modernisation or adaptation of agriculture and forestry																			
		4.4	support for non-productive investments linked to the achievement of agri-environment-climate objectives																			
art 18	restoring agricultural production potential/prevention	5																				
		5.1	support for investments in preventive actions aimed at reducing the consequences of probable natural disasters, adverse climatic events and catastrophic events																			
		5.2	support for investments for the restoration of agricultural land and production potential damaged by natural disasters, adverse climatic events and catastrophic events																			
art 19	farm and business development	6																				
		6.1	business start up aid for young farmers																			
		6.2	business start up aid for non-agric activities in rural areas																			
		6.3	business start up aid for development small farms																			
		6.4	support for investments in creation and development of non-agricultural activities																			
		6.5	payments for farmers eligible for the small farmers scheme who permanently transfer their holding to another farmer

		preparation and implementation of cooperation activities of the local action group (19.3)																		0
support for running costs and animation (19.4)																		0		

\* indicative breakdown

## ANNEX 2

### IDENTIFICATION OF CONTRIBUTIONS TO OTHER FOCUS AREAS

*A table is capturing (qualitatively) the contributions of some interventions to other objectives than the ones they are programmed for (table 3- table 11.3 in SFC 2014).*

At programming level, table 3 below (based on a fictive example) shows the anticipated contributions of RD measures/sub-measures programmed under a given FA to other FAs. These potential contributions of interventions to other FAs do *not* have to be quantified (ex ante) in the programme, but simply "ticked".

( in Table 3).

Example 1: Natura 2000 payments are used in areas where biodiversity is an important issue, and thus are programmed under Priority 4 and the hectares covered count for the biodiversity target; these payments can however also be considered beneficial to carbon conservation, even though they are not specifically designed to address these issues. In this case, a contribution of Natura 2000 payments to FA 5E can be indicated.

Example 2: (some of the) investment projects programmed for the restructuring of farms (FA 2A) could have an effect on efficiency in water use (FA 5A), on energy efficiency (FA 5B), or on the use of renewable sources of energy (FA 5C), depending on the business plan underlying the application.

**Table 3 – Contributions to other Focus Areas (example based on generic intervention)**
